Sector-13 Rajiv Nagar, Gurugram, India

Immediate Joiner

PROFESSIONAL SUMMARY

B.Tech Electronics & Communication Engineering graduate with hands-on CCNA and CCNP Enterprise training in routing, switching and network configuration, troubleshooting. Practical experience configuring Cisco routers and switches, VLANs, Trunking, STP, DHCP, ACLs, and Routing Protocols across physical and simulated environments. Skilled in LAN connectivity troubleshooting using Cisco IOS, Ping, Traceroute. Seeking an entry-level Network Engineer, NOC Engineer role.
Core: Routing & Switching | LAN/WAN | VLAN | STP | OSPF | EIGRP | DNS | DHCP | ACL | NAT | Network Troubleshooting

TECHNICAL SKILLS

- **Networking Fundamentals And Networking Services:**
  OSI Model, TCP/IP Model, TCP/UDP, Subnetting, ARP, ICMP, LAN/WAN, NAT, PAT, DNS Basics, DHCP
- **Routing Protocols :**
  Static Routing, OSPF, EIGRP, BGP Basics
- **Switching:**
  VLAN, Trunk, DTP, VTP, STP, MST, EtherChannel
- **Network Security:**
  Cisco ASA Firewall, ACL, IPsec, VPN, GRE VPN, DMVPN, NAT-T
- **Troubleshooting And Tools:**
  Cisco IOS CLI, Ping, Traceroute, GNS3, EVE-NG, Cisco Packet Tracer

HANDS-ON NETWORK And IT INFRASTRUCTURE TRAINING

- **CCNA & CCNP Enterprise Training (Dec 2025 – July 2026)**
  Network Bulls, Gurugram
  - Completed intensive training in networking fundamentals including IP Addressing, Routing, Switching, VLANs, Subnetting, and Network Security.
  - Built and tested LAN environments using VLANs, Trunking, STP, EtherChannel, DHCP and ACLs.
  - Configured and troubleshot Cisco routers and switches in physical and simulated network labs.
  - Developed practical knowledge of TCP/IP, OSPF, EIGRP, WAN technologies, and network troubleshooting methodologies.
- **CCIE Security Training Pursuing (July 2026)**

PROJECTS

•Built a Secure site-to-site IPsec VPN on Cisco ASA Firewall.

- Configured Site-to-Site IPsec VPN on Cisco ASA for secure LAN-to-LAN communication between two remote sites.
- Implemented Policy NAT to bypass NAT for VPN traffic while applying NAT/PAT for Internet-bound traffic.
- Configured ACLs, IKE, IPsec policies, routing, and NAT rules for end-to-end connectivity.
- Tested and troubleshot VPN tunnel, LAN-to-LAN communication, Internet access, and NAT translations using ping, traceroute, ASA commands.

•Built a Secure site-to-site IPsec VPN with overlapping Subnets using Cisco ASA Firewall.

- Configured Site-to-Site IPsec VPN on 2 Cisco ASA Firewalls between 2 sites using overlapping 192.168.1.0/24 LAN networks.
- Implemented NAT-based subnet translation to enable secure communication between 2 overlapping LAN networks with identical IP addressing.
- Verified LAN-to-LAN connectivity between both sites using ping, traceroute, NAT translations, and ASA VPN verification commands.

•Built a Secure Multi-Area OSPF Implementation using Virtual Links and MD5

- Configured OSPF across 12 routers in Areas 0, 51, 66, and 76 using structured IP addressing. Configured loopbacks and manual OSPF router-IDs for stable router identification.
- Implemented OSPF MD5 authentication, configured Virtual links (to make connection between backbone area and standard area) and verified neighbor adjacencies and routing.
- Troubleshot OSPF authentication, neighbor, and reachability issues using Cisco IOS commands.

EDUCATION

C.V. Raman Global University — **Nov 2022 – Jun 2025**
B.Tech in Electronics and Communication Engineering — *CGPA: 7.58/10*
Government Polytechnic College, Sahibganj(JUT) — **Mar 2019 – Jun 2022**
Diploma in Electrical and Electronics Engineering — *80.48%*
